Protein Structure & Molecular Enzymology

Vol. 1203, 1993

Cumulative Contents

Information for Contributors *vii*

Review

Structural and functional aspects of the interaction between growth hormone and its receptor
J. Beattie (UK) 1

Regular Papers

Oxidative damage to lysozyme by the hydroxyl radical: comparative effects of scavengers
E. Franzini, H. Sellak, J. Hakim and C. Pasquier (France) 11

Sucralfate and soluble sucrose octasulfate bind and stabilize acidic fibroblast growth factor
D.B. Volkin, A.M. Verticelli, K.E. Marfia, C.J. Burke, H. Mach and C.R. Middaugh (USA) 18

Physico-chemical characterization of a recombinant cytoplasmic form of lysine: N^6-hydroxylase
A.M. Thariath, K.L. Fatum, M.A. Valvano and T. Viswanatha (Canada) 27

Inverse relationship of the dehydrogenase and ADP-ribosylation activities in sodium-nitroprusside-treated glyceraldehyde-3-phosphate dehydrogenase is coincidental
V.V. Vaidyanathan, P.S. Sastry and T. Ramasarma (India) 36

A kinetic study of an unstable enzyme measured through coupling reactions. Application to the self-inactivation of detergent-solubilized Ca^{2+}-ATPase from sarcoplasmic reticulum
S. Corbalán-García, J.A. Teruel, R. Varón, F. García-Cánovas and J.C. Gómez-Fernández (Spain) 45

The caldesmon content of vertebrate smooth muscle
W. Lehman, D. Denault and S. Marston (USA, UK) 53

Chemical modification of the Ca^{2+}-ATPase of rabbit skeletal muscle sarcoplasmic reticulum: identification of sites labeled with aryl isothiocyanates and thiol-directed conformational probes
A. Wawrzynów and J.H. Collins (USA) 60

A tyrosine residue is involved in the allosteric binding of tryptophan to yeast chorismate mutase
C. Ramilo, G. Braus and J.N.S. Evans (USA, Switzerland) 71

Stability and kinetics of a bifunctional amylase/trypsin inhibitor
S. Alagiri and T.P. Singh (India) 77

The role of acidic amino-acid residues in catalytic and adsorptive sites of *Bacillus cereus* sphingomyelinase
M. Tomita, Y. Ueda, H.-o. Tamura, R. Taguchi and H. Ikezawa (Japan) 85

The glutamyl binding site of trypanothione reductase from *Crithidia fasciculata*: enzyme kinetic properties of γ-glutamyl-modified substrate analogues
A.F. El-Waer, K. Smith, J.H. McKie, T. Benson, A.H. Fairlamb and K.T. Douglas (UK) 93

EPR studies on the photoproducts of manganese(II) protoporphyrin-IX substituted myoglobin nitrosyl complexes trapped at low temperature: effects of site-specific chemical modification of the distal histidine on ligand-binding structures
F. Masuya and H. Hori (Japan) 99

A pulse radiolytic study on the reaction of hydroxyl and superoxide radicals with yeast Cu(I)-thionein
K. Felix, E. Lengfelder, H.-J. Hartmann and U. Weser (Germany) 104

Phosphorylation of human sperm protamines HP1 and HP2: identification of phosphorylation sites
F. Chirat, A. Arkhis, A. Martinage, M. Jaquinod, P. Chevaillier and P. Sautière (France) 109

Kinetic mechanism of human erythrocyte acidic isoenzyme ρ
A.E.A. Thumser and K.M. Ivanetich (South Africa, USA) 115

Cooperativity in the unfolding transitions of cysteine proteinases. Calorimetric study of the heat denaturation of chymopapain and papain
S. Solís-Mendiola, A. Rojo-Domínguez and A. Hernández-Arana (México) 121

Chemical modification of bile acid: CoA ligase
D.A. Vessey and A.M. Benfatto (USA) 126

Human Mu-class glutathione *S*-transferases present in liver, skeletal muscle and testicular tissue
A.J. Hussey and J.D. Hayes (UK) 131
Proton transfer in the catalytic mechanism of carbonic anhydrase. Effects of placing histidine residues at various positions in the active site of human isoenzyme II
Z. Liang, B.-H. Jonsson and S. Lindskog (Sweden) 142
Chemical modification of tissue inhibitor of metalloproteinases-1 and its inactivation by diethyl pyrocarbonate
R.A. Williamson, B.J. Smith, S. Angal and R.B. Freedman (UK) 147
Expression, purification and binding to the receptor of human insulin-like growth factor II
T. Miyagishima, S. Gasa, K. Honke, M. Sakai, S. Nishi, M. Yamamoto, K. Nishikawa, T. Miyazaki and A. Makita (Japan) 155
Characterization of a filtrable 3′-nucleotidase of *Leishmania donovani*
G.O. Gbenle (Nigeria, USA) 162

Rapid Reports

Residues 287–301 of human ribonuclease inhibitor do not affect ribonuclease activity and inhibitor binding; a reply
J. Fominaya, U. Neumann and J. Hofsteenge (Switzerland) 168
Dynamics of protoporphyrin IX in the heme pocket of horseradish peroxidase
J.E. Brunet and M. Pulgar (Chile) 171

Regular Papers

Association of the *mcrD* gene product with methyl coenzyme M reductase in *Methanococcus vannielii*
D. Stroup and J.N. Reeve (USA) 175
Twin plastocyanin dimorphism in tobacco
M.I. Dimitrov, A.A. Donchev and T.A. Egorov (Bulgaria, Russia) 184
CD and FTIR studies of an immunogenic disulphide cyclized octadecapeptide, a fragment of a snake curaremimetic toxin
H. Lamthanh, M. Léonetti, E. Nabedryk and A. Ménez (France) 191
Presence of proteins recognized by mammalian cytochrome *P*-450 antibodies in *Euglena gracilis*
J. Briand, H. Julistiono, P. Beaune, J.P. Flinois, I. De Waziers and J.P. Leroux (France) 199
Characterization of the three ^{125}I-iodination isomers of human insulin-like growth factor I (IGF1)
L. Schäffer, U.D. Larsen, S. Linde, K.R. Hejnæs and L. Skriver (Denmark) 205
Partial characterization of protein kinase C from an insect cell line
J. Gupta and R.G.H. Downer (Canada) 210
Purification and properties of cytochrome *P*-450 (P-450$_{lun}$) catalyzing steroid 11β-hydroxylation in *Curvularia lunata*
K. Suzuki, K.-i. Sanga, Y. Chikaoka and E. Itagaki (Japan) 215
Identification of the characteristic amino-acid sequence for human α-amylase encoded by the *AMY2B* gene
K. Omichi and S. Hase (Japan) 224
Purification and characterization of the myofibrillar form of myosin light-chain phosphatase from turkey gizzard smooth muscle
G. Nowak, F. Rainer and A. Sobieszek (Austria) 230
Purification of the antibacterial fragments of guinea-pig major basic protein
Y. Hashimoto, I. Nagaoka and T. Yamashita (Japan) 236
Estimation of stabilities of staphylococcal nuclease mutants (Met^{32} → Ala and Met^{32} → Leu) using molecular dynamics/free energy perturbation
N. Yamaotsu, I. Moriguchi and S. Hirono (Japan) 243
Xenobiotic induction of quinone oxidoreductase activity in lens epithelial cells
S.J. Tumminia, P.V. Rao, J.S. Zigler, Jr. and P. Russell (USA) 251
Aldose and aldehyde reductases from human kidney cortex and medulla
B. Robinson, L.A. Hunsaker, L.A. Stangebye and D.L. Vander Jagt (USA) 260
Dynamics and thermodynamics of acid–alkaline transitions in metmyoglobins lacking the usual distal histidine residue
Y. Yamamoto, T. Suziki and H. Hori (Japan) 267
Evidence for proximal cysteine and lysine residues present at the nucleotide domain of rabbit muscle creatine kinase
S. Sheikh, K. Mukunda and S.S. Katiyar (India) 276
Casein kinase II β-subunit inhibits the activity of the catalytic α-subunit in the absence of salt
T. Tiganis, C.M. House and B.E. Kemp (Australia) 282
Spectroscopic study of the temperature-dependent conformation of glucoamylase
M. Urbanova, P. Pancoska and T.A. Keiderling (USA, Czech Republic) 290

A Thermodynamic model for denaturation of granulocyte colony-stimulating factor: *O*-linked sugar chain suppresses not the triggering deprotonation but the succeeding denaturation
M. Hasegawa (Japan) 295

Charge isomers of urinary bikunin (trypsin inhibitor)
Y. Yuki, K. Nomura, M. Kirihara, M. Shimomura, H. Hiratani, R. Nishimura and K. Kato (Japan) 298

Structural analysis of the extension peptides on matrix forms of type V collagen in fetal calf bone and skin
C. Niyibizi and D.R. Eyre (USA) 304

Zinc as modulator of oxygenation function and stabilizer of quaternary structure in earthworm hemoglobin
T. Ochiai, S. Hoshina and I. Usuki (Japan) 310

Cumulative Contents, Vol. 1203 315
